PROFESSIONAL SUMMARY

Technical project manager with 14+ years in software development and project management experience since 2019. Leads a 10-member team, handling client discussions, project scope, task allocation, and code reviews. Combines hands-on Python, PHP, and Next.js development with AI automation, including tools supporting 1,000+ calls, 100,000+ cumulative emails, and approximately 80% lower spam rate through email validation.

PROFESSIONAL EXPERIENCE

Ksoft Technologies | Cherpulassery, Palakkad, Kerala
Project Manager | 2019 - Present

- Serve as Project Manager and team lead for custom software and ERP projects, leading 10 developers; handle client meetings, prepare project scope, and allocate development tasks.
- Review code alongside hands-on Python, PHP, and Next.js development; use the company's internal task tracker and client-required Jira or Trello for task management.
- Independently developed an AI sales calling agent using Python, OpenAI APIs, Twilio, and Retell AI; completed 1,000+ calls and automated calling work previously handled by a three-person sales calling team.
- Independently developed Amazon SES email automation with campaign scheduling, multiple SMTP providers, and sender configuration; sent 100,000+ emails cumulatively. Built a separate bulk email validation tool that reduced campaign spam rate by approximately 80%.
- Built internal WhatsApp chatbot and campaign tools using Next.js, Python, MySQL, and Meta's WhatsApp APIs; also set up a separate internal campaign automation tool.
- Independently developed Python lead scraping tools that read Excel inputs, collect contact details from websites, and export results to Excel, reducing manual collection work.
- Independently rebuilt and migrated Schic, a WooCommerce platform for a Bahrain client with 1,000+ products and 90,000+ customer records; built the replacement alongside the live site and switched over in approximately one month.

Ksoft Technologies | Cherpulassery, Palakkad, Kerala
PHP Developer | 2014 - 2019

- Developed PHP web applications; progressed to Project Manager in 2019.

Safe Technologies | Palakkad, Kerala
PHP Developer | 2012 - 2014

- Developed PHP web applications before joining Ksoft Technologies in 2014.

TECHNICAL SKILLS

Programming Languages: Python, PHP, JavaScript

Frontend Technologies: HTML5, CSS3, jQuery

Frameworks: Next.js, CodeIgniter

Backend Technologies: Node.js, PHP and Python API development

Browser Extensions: Chrome extension development

AI and LLM Integration: OpenAI APIs; retrieval-augmented generation (RAG) setup; Model Context Protocol (MCP) server development; Claude agentic programming, API integration, automation, skills, and connectors; Ollama setup and configuration

AI Agents and Workflow Automation: AI cold calling agent development, AI front-office call agent setup, Twilio, Retell AI, n8n, AI appointment booking automation using Make.com, Square (Squareup) automation, Autodesk Revit automation, data and web scraping

API Development and Integrations: REST API, third-party APIs, map integrations, Firebase integrations; WhatsApp API integration, chatbot development, automation, and lead capture; payment integrations with Razorpay, PayU Money, Stripe, and PayPal

Databases: MySQL, PostgreSQL, MongoDB

Cloud Infrastructure and Deployment: AWS EC2, AWS Lightsail, Amazon SES, AWS server setup and configuration, cPanel, custom server configuration

Ecommerce and CMS: WordPress, WooCommerce, Shopify; Magento setup and basic configuration; custom WordPress plugin development and existing plugin customization

Development Tools and Version Control: Git, Bitbucket, Sourcetree

Technical Leadership and Project Management: 10-member team leadership, client meetings, project scope preparation, task allocation, code reviews, Jira, Trello, internal task tracker

SELECTED PROJECTS

Schic | WooCommerce, AWS
Independently delivered the end-to-end rebuild and migration of a Bahrain ecommerce platform hosted on AWS with auto scaling; migration scale and timing are detailed under Professional Experience.

GoPit | PHP, Flutter, Python
Managed Flutter mobile app development by another developer; independently built the remaining search engine components, including the PHP website, Python scraping, search provider APIs, Skyscanner integration, and Leaflet maps.

LeaseLark | Next.js, PHP, Python, MySQL
Managed the SaaS property management project end to end, covering client interaction, requirements gathering, scope preparation, task allocation, integration, and deployment. Platform stack: Next.js, PHP and Python APIs, and MySQL.

Visio Square | PHP, MySQL, Razorpay, FedEx
Independently built a US-based contact lens store end to end, with patient-to-manufacturer ordering, Razorpay payments, and FedEx shipping integration.

News Scraping | Playwright, OpenAI
Independently built a client news portal tool end to end, collecting news from 64+ providers without APIs or RSS feeds using Playwright and OpenAI.

AI Video Chatbot | Python, Next.js, MongoDB
Independently built a telecom AI video chatbot end to end that acts as a company representative and guides users through a Ready for Next (RFN) form.

Additional work: Project management and team leadership for other custom software and ERP projects; experience with custom websites, WooCommerce, and Shopify stores.

EDUCATION

Diploma in Computer Engineering | 2012
IPT & GPTC, Shoranur, Kerala
